WORK EXPERIENCE

Aapka Sahara Foundation | Student Fundraiser

(Sept '25 - Oct '25)

- Connected with donors in a respectful and personal way, no forced pitches, just genuine conversations.
- Kept track of donations and updates to ensure complete transparency with the foundation.
- Worked closely with the Campus Fundraising Head, learning valuable strategies to build trust and inspire support.

PROJECTS

Money Mate - Personalized Finance Management System | Flask, Python, HTML, CSS, MySQL

- Developed a web-based personal finance management system for automated financial tracking.
- Implemented bank statement processing with automatic transaction categorization.
- Built features for expense tracking, subscription detection, and spending behavior analysis.
- Integrated machine learning-based financial insights and scenario simulation for planning.

SocioServe: A Web-Based Solution for NGO and Volunteer Engagement | Java, JavaScript, HTML, CSS, H2 Server

- Developed a full-stack web application to connect NGOs and volunteers through a centralized platform for event management and community engagement.
- Built role-based modules (Admin, NGO, Volunteer) with features like event creation, volunteer registration, participation tracking, and real-time updates.
- Implemented secure authentication, responsive UI, and data management using MySQL. The platform improves coordination, transparency, and accessibility for social initiatives.

TECHNICAL SKILLS

- Java, Python, C++, SQL, HTML, CSS proficiency
- React.js and Node.js frameworks
- Basic Spring Boot understanding
- MongoDB database management
- Git and Linux version control
- Windows operating system expertise
- Backend development skills
- REST API architecture
- Continuous integration and delivery practices
